

## PRACTICAL-5(B)

**Aim:** Write a program to reverse the given digit.

**CODE:**

```
import java.util.Scanner;

public class p5b {

    public static void main(String[] args) {

        Scanner S=new Scanner(System.in);

        int n,d=0,r;

        System.out.println("enter the number to reverse:");

        n=S.nextInt();

        while(n!=0)

        {

            r=n%10;

            d=d*10+r;

            n=n/10;

        }

        System.out.println("the reversed number is:"+d);

    }

}
```

**OUTPUT:**

```
Output - 127CE (run) x
run:
enter the number to reverse:
12345
the reversed number is:54321
BUILD SUCCESSFUL (total time: 6 seconds)
```
